A Message to Our Dealers

SEXAUER 660 BRAND

GET THESE 6 ALFALFA FEATURES FROM 1 VARIETY BLEND

1. Increased yields.
2. Increased winter hardiness.
3. Increased drought and disease resistance.
4. Quicker seedling, vigorous growth.
5. Quick recovery after cutting.
6. Guaranteed high purity and germination.

The Sexauer Company takes the guesswork out of choosing which alfalfa variety will do best on your farm. SEXAUER 660 Brand, a blend of Northern grown alfalfa varieties proven to do best in this area. You get the best of all types of each of the currently recommended varieties, to free you from the often inconsistent performance of single variety alfalfas. SEXAUER 660 Brand is formulated from selected strains of hardy Northern-grown alfalfas of varied origin. The bags are sealed for your protection. When the seal is unbroken we guarantee the contents to be pure SEXAUER 660 Brand alfalfa.

From SEXAUER 660 Brand you can expect consistent performance and higher yields year after year than you winter-hardy alfalfa stands.

PERFECTED THROUGH MODERN SEED SCIENCE

No single variety of alfalfa has all the features farmers want. Some are more resistant to drought and insectary wilt, some live longer, some recover faster, some are more winter-hardy.

Experience with Northern seeds dating back to 1891 combined with the latest scientific methods of seed selection has enabled the Sexauer Company to develop the new "660 Brand" to give you better alfalfa crops year after year. SEXAUER 660 Brand meets our highest standards for purity, germination, and freedom from noxious weeds. It is a product of quality—a trade name we attach only to top quality seed.

EXCLUSIVE PROCESS IMPROVES EARLY STANDS

The Sexauer Company is using a special process to give SEXAUER 660 Brand alfalfa quick germination. This process does not injure the seed coat as old scarification methods often did, but enables the seedling to break out of the seed coat easily.

SEXAUER 660 provides excellent stands of hardy Northern Alfalfa with increased drought and disease resistance.

CALIVERDE ALFALFA

Get Two Crops From the Same Field

By seeding CALIVERDE non-hardy alfalfa along with small grain you can get both a cash grain crop and a soil-building erone manure crop the same year from the same field. Many South Dakota farmers have discovered the easy way to boost per acre returns from fields not needed for hay or pasture crops of hardy legumes.

By plowing down Sexauer CALIVERDE after one season's growth you add the equivalent of 10 to 15 tons of organic nitrogen per acre to the soil. Corn crops that follow a CALIVERDE plow down often show increases of 15 to 25 bushels per acre.

During its growth, CALIVERDE shoots down roots to a depth of three feet—opening up the soil and breaking up hard pan, increasing the soil's water-holding capacity.

See your local Sexauer seed dealer for CALIVERDE alfalfa now.
